we invent, you succeed

YOUR ROLE

Planning, setting-up and execution of laboratory tests, application of modern test methods. Personally responsible for subtasks within a Research & Development project.

OUR REQUIREMENTS

You enjoy chemistry and working in a team. You want to go off the beaten track. You possess interdisciplinary thinking combined with structured scientific work and practical requirements.

YOUR PROSPECTS

We offer an interesting topic for your thesis and the chance to work in a young, dynamic team. And if the chemistry is right, we will keep you on to work on your own project. You will receive an appropriate monthly salary. We will of course help you to find somewhere to live. For further information please look on our website: www.prometho.com
