## YOUR ROLE

Feel like a chemist by planning, setting-up and execution of laboratory tests as well as application of modern test methods.  
Manage your own tasks within a Research & Development project.

## OUR REQUIRE MENTS

You enjoy chemistry and working in a team.  
You want to go off the beaten track.  
You possess interdisciplinary thinking combined with structured scientific work and practical requirements.

## YOUR PRO SPECTS

We offer an interesting topic for your internship and the chance to work in a young, dynamic team.  
You will receive an appropriate monthly salary.  
We will of course help you to find somewhere to live. For further information please look on our website: [www.prometho.com](http://www.prometho.com)
